Tel: 0086-512-6238 5166

DoGain

DoGain Optoelectronic Technology (Suzhou) Co., Inc.

Advanced Manufacturer of
Semiconductor-based Diode Laser Chips and Modules

01 Company Overview

Advanced Manufacturer of Semiconductor-based Diode Laser Chips and Modules

DoGain

Dogain Optoelectronic Technology (Suzhou) Co.,LTD. (Dogain Optoelectronic), founded in 2017, is a semiconductor based diode laser manufacture with headquarter located in Suzhou, China.

Dogain Optoelectronic positions upstream of optoelectronic industry, with flexibility in diode laser chip fabrication, packaging, testing and characterization, provides product portfolios covering high-power diode laser components, 980nm pumps and VCSELs.

Dogain Optoelectronic dedicates to be a global R&D center and manufacture center of diode lasers for applications of industry processing, telecom, sensing, medical & health etc.

Attitude

Enjoy doing
Enjoy gaining

Mission

Gather talents to provide world's 1st class semiconductor-based diode lasers.

Core Value

Perfection, Innovation, Win-win, Keeping improving

Vision

World's leading R&D center and manufacturer for semiconductor-based diode lasers

Layout 02

Advanced Manufacturer of Semiconductor-based Diode Laser Chips and Modules

Jiangsu·Suzhou (Headquarter)
DoGain Optoelectronic Technology (Suzhou) Co., Inc.

Shaaxin·Xi'an (Sales Office)
Xi'an Subsidiary

Guangdong·Shenzhen (R&D)
Shenzhen Subsidiary

Jiangsu·Zhenjiang (Packaging) Jiangsu Tianyuan Technology Co., Ltd.

Jiangsu·Nantong (Manufacture Center)
DoGain Optronics (Nantong) Technology Co., Ltd.

2023

All-round development

- Renamed "DoGain Optoelectronic Technology (Suzhou) Co., Inc."
- Two subsidiaries, "Suzhou DoGain Optoelectronic Device Co., Ltd." and "Suzhou DoGain Vertical Cavity Chip Co., Ltd." were founded.
- Setting up Beijing, Wuhan, Shenzhen and Xi'an 4 Regional marketing centers, as well as Overseas marketing center.
- World's first 55W 9xxnm single emitter chip is released.
- 940nm diode laser chip and fiber coupled module, with high temperature resistance performance for vehicle LIDAR is introduced.

2022

Mass production

- Fiber-coupled module manufacture center completed and put into production.
- Awarded the most promising high-tech enterprise and provincial-enterprise technology center.

Volume production

- Completed B++ round and C round fund-raising.
- Acquired ISO9001 Quality System Certification.
- VCSEL, 980nm single mode pumps started to sell.
- New R&D building completed and went into service.
- Started volume sales of HPL SE chips and HPL fiber-coupled module.

2021

Technique development

- Completed whole production process optimization, all products passed reliability tests.
- Mass production of lasers for pumping, medical and industrial.
- Awarded municipal enterprise technology center, chosen to be municipal unicorn.
- Completed B+ round fund-raising.

2020

Infrastructure

- Completed installation and operation of first MOCVD equipment.
- Successfully developed epitaxy technology, enter into new stage of independent R&D.
- R&D. Constructed FAB production line and packaging line, started chip production.

2019

Initialization

- Completed A round fund-raising.
- Completed construction of 2550m² class1000 clean room and chip production line.

2018

Foundation

- Registered DoGain brand, received first investment funding
- Completed angle round fund-raising, start full IDM building processes

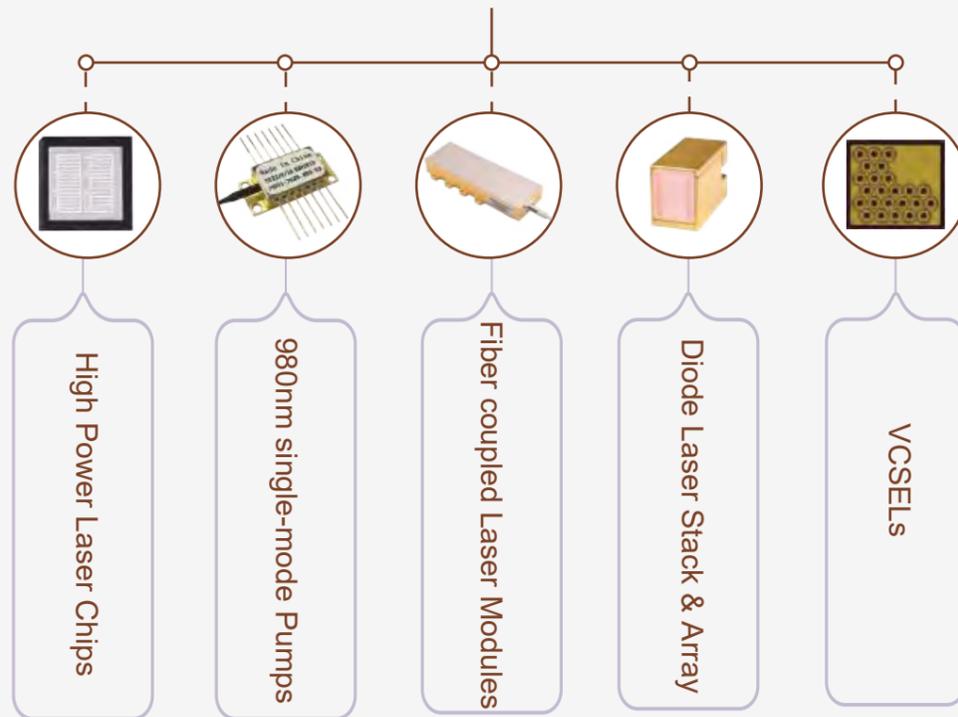

2017

> 150 Patents Authorized
> 51 patents for invention (Updated Aug. 2022)

Five Key Product Categories

High Power Multi-mode SE Chips: 700 nm ~ 1100 nm 5 W - 45 W

High power semiconductor laser chips are key components for laser pumping, material processing and advanced manufacture. With wavelength range of 700 nm ~ 1100 nm and output power of 5 W ~ 45 W for single emitter

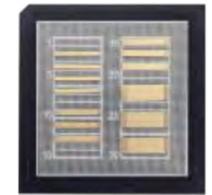

- Wavelength: 700 nm ~ 1100 nm
- Output power: 5 W ~ 45 W
- Emitting width: 100 μ m ~ 320 μ m
- Cavity length: 1 mm ~ 5.5 mm
- Polarization: TE 95 % ~ 97 %
- Features: High PER, small divergence, high EO efficiency, high wavelength uniformity

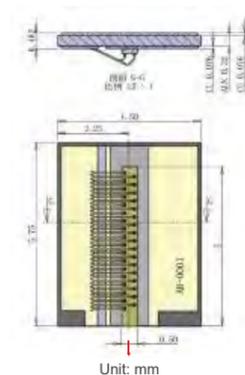

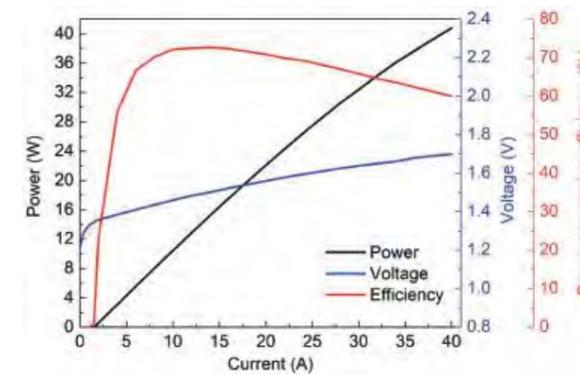

High Power Bar chips: 700 nm ~ 1100 nm 50 W - 700 W

High power semiconductor laser chips are key components for laser pumping, material processing and advanced manufacture. With wavelength range of 700 nm ~ 1100nm, and output power of 50 W ~ 200W (CW) 100 W ~ 700W for single bar

- Wavelength: 700 nm ~ 1100 nm
- Output power: CW 50 W ~ 200 W
QCW 100 W ~ 700 W
- Fill factor: 20 % ~ 80 %
- Cavity length: 1 ~ 4 mm
- Polarization: TE
- Features: High EO efficiency, high COMD, high wavelength uniformity

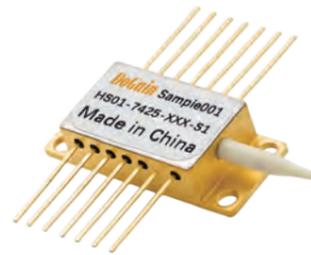

Performance

980 nm pumps – HS Series

Features

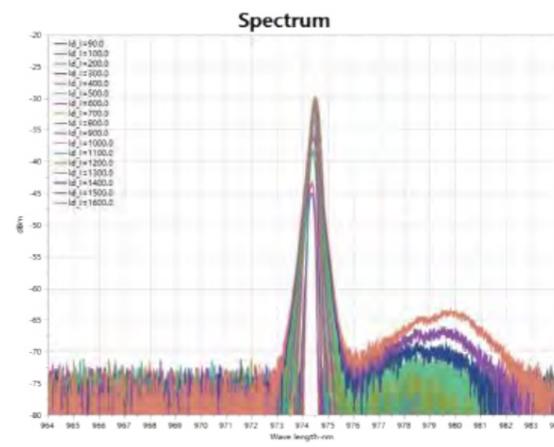

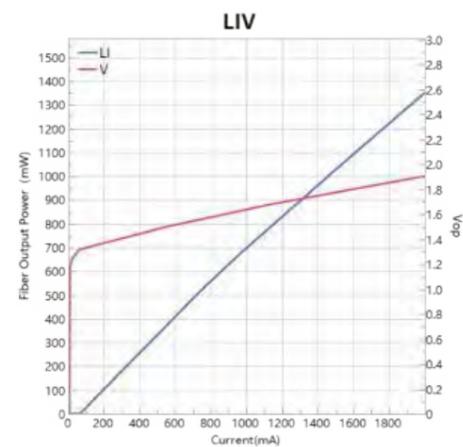

- Using Dogain Optoelectronic independent-developed chips
- 14 pin Butterfly packaging
- Maximum output power of 1100 mW (Kink-free) from single mode fiber
- Working temperature range: -20 ~ 75 °C
- High efficient TEC temperature control (Ts=25°C)
- High wavelength stabilization with FBG
- Unique fiber couple technology, high efficiency, high stabilization
- SM/PM fiber and FC-APC/UPC connector optional
- Apply to Telcordia GR-468-CORE standards

Applications

- Multi-stage DWDM system (EDFAs)
- Low noise EDFAs
- Pumping for ultrafast laser seeds
- Pumping for ASE sources
- CATV

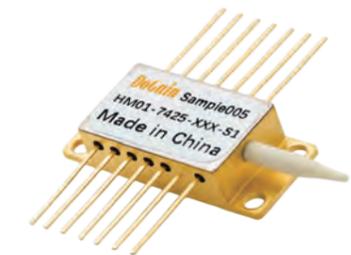

Performance

980 nm pumps – HM Series

Features

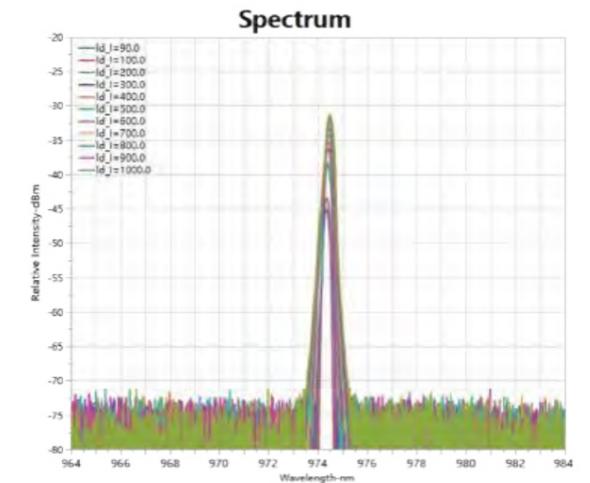

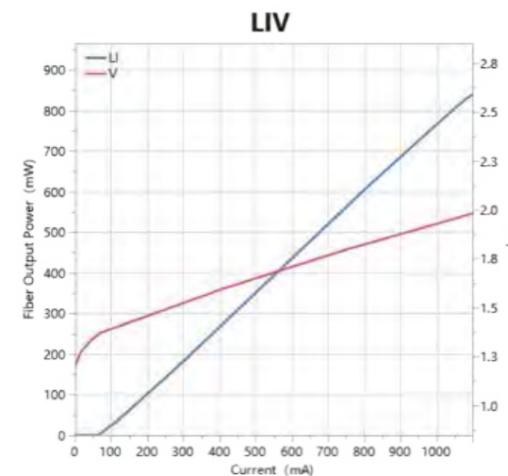

- Using Dogain Optoelectronic independent-developed chips
- 10 pin Butterfly packaging
- Maximum output power of 600 mW (Kink-free) from single mode fiber
- fiber Working temperature range: -20 ~ 75 °C
- High efficient TEC temperature control (Ts=25/40 °C)
- High wavelength stabilization with FBG
- Unique fiber couple technology, high efficiency, high stabilization
- SM/PM Fiber optional and FC-APC/UPC connector
- Apply to Telcordia GR-468-CORE standards

Applications

- Multi-stage DWDM system (EDFAs)
- Low noise EDFAs
- Pumping for ultrafast laser seeds
- Pumping for ASE source
- CATV

Performance

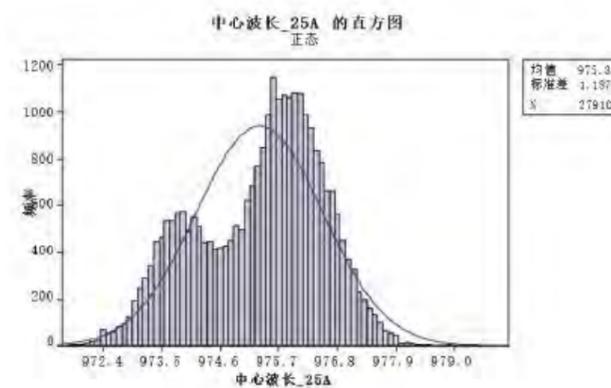

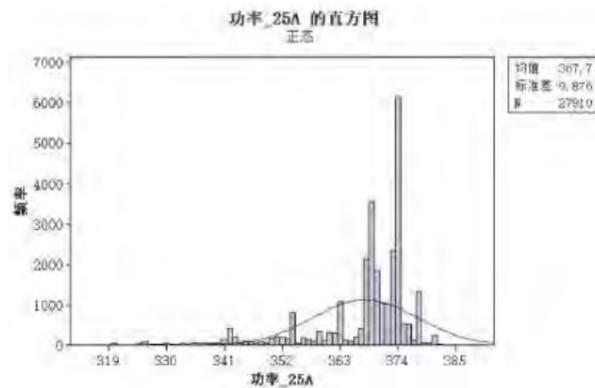

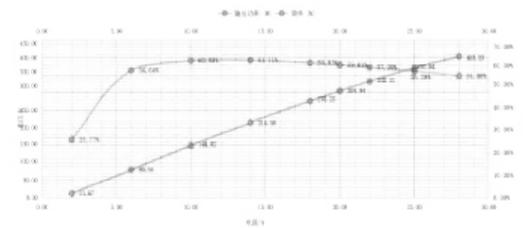

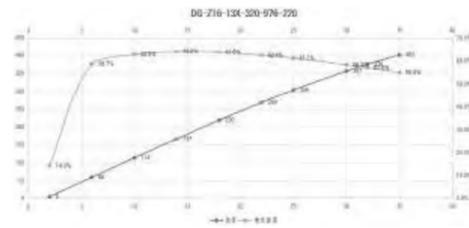

Multi-mode pumping module for Fiber laser

Features

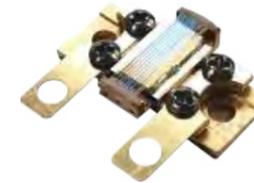

- Wavelength: 792 nm, 808 nm, 878.6 nm, 880 nm, 885 nm, 915 nm, 976 nm
- Fiber type: Output power:
 - 105/125 um 10 ~ 200 W
 - 135/155 um 30 ~ 300 W
 - 200/220 um 25 ~ 640 W
 - 220/242 um 320 ~ 640 W
- Connector: SMA905/FC
- Features: High EO efficiency, compact size, high reliability, high stability

Performance

Conduction-cooled stacks

- High peak power
- High reliability, long lifetime
- Work in harsh environment
- AuSn hard-solder packaging

Wavelength Coverage 760 nm - 1100 nm				
Typical Parameters (at 25°C)	Units	Typical Value		
Peak Power	W	2000 ~ 24000	6000	15000
Bar Width	mm	10	3	5
Operation Mode		Pulsed		
Operating Current	A	100 ~ 800	120	200
Number of Bars	#	up to 30	up to 60	up to 80
Operating Voltage	V	1.7 ~ 2.2		
EO Conversion Efficiency	%	~ 60		
Bar to Bar Pitch	mm	0.35, 0.43, 0.73, 1.21		
Beam Divergence				
Fast Axis (FWHM)	°	35		
Slow Axis (FWHM)	°	10		
Advanced Fast Axis Beam Collimation	°	0.5 ~ 5		
Option	#	Multi-wavelength in a single array; Operation Tem. Up to 85°C; Customizable Packaging		

Water cooled vertical stacks

- AuSn hard solder packaging
- High power, high pulse energy
- Narrow spectrum, low smile

Wavelength Coverage 760 nm - 1100 nm				
Typical Parameters (at 25°C)	Units	Typical Value		
Peak Power	W	80000	200~3000	200~6000
Bar Width	mm	10		
Operation Mode		Pulsed		CW
Operating Current	A	500, 600, 800	50, 100	100, 150, 200
Number of Bars	#	up to 100	up to 30	up to 40
Operating Voltage	V	~ 2.1	1.8	~ 2
EO Conversion Efficiency	%	~ 60	55	55
Bar to Bar Pitch	mm	1.5, 1.83	1.2, 1.83, 2.56, 3.41	1.83
Duty Cycle	%	up to 20	up to 40	
Beam Divergence				
Fast Axis (FWHM)	°	35		
Slow Axis (FWHM)	°	10		
Advanced Fast Axis Beam Collimation	°	0.5 ~ 5		
Option	#	Multi-wavelength in one stack; Customizable Packaging		

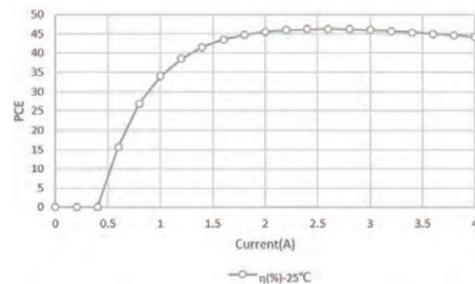

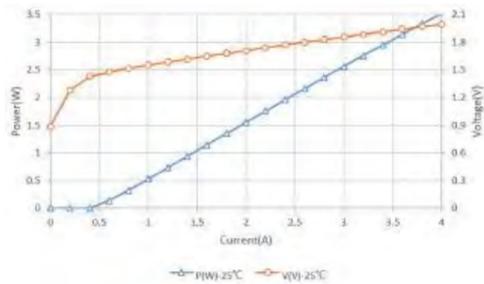

- Volume production capability
- Customization of wavelength, power and angle
- Complete production line covering VCSEL epitaxial and FAB processes
- World's leader of industrial equipments and techniques for semiconductor laser chip

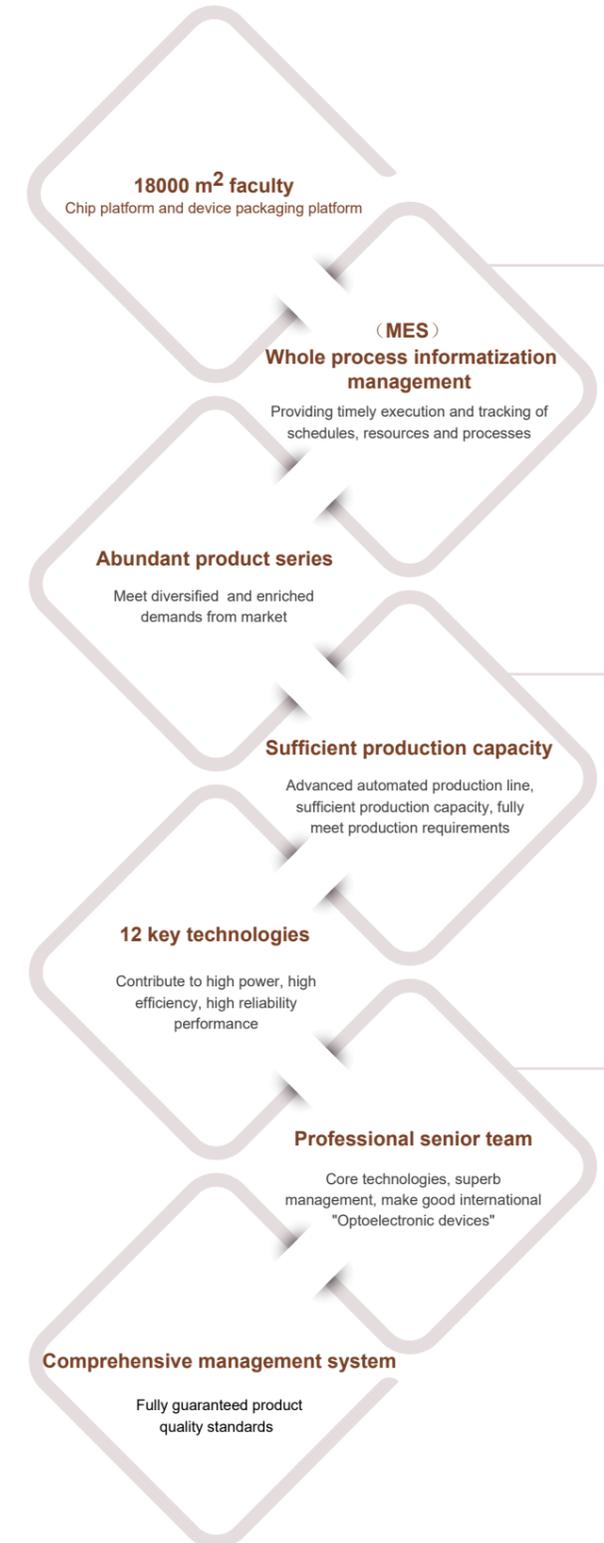

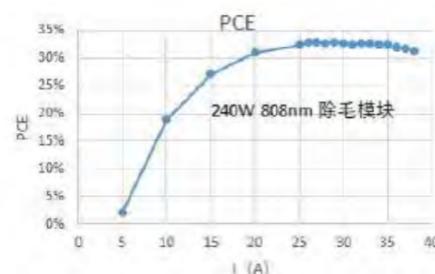

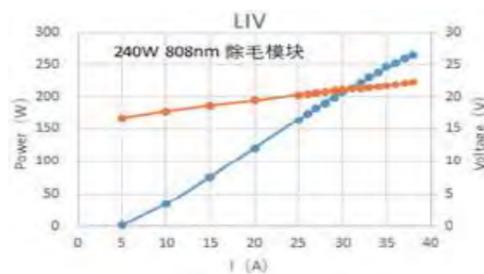

VCSEL Chips

- Wavelengths: 680 nm, 808 nm, 850 nm, 905 nm, 940 nm
- Structural: Single emitter, array, structure light, addressable, in-line
- Power scale: 5 mW, 10 mW, 15 mW, 210 mW, 500 mW, 1 W, 2 W, 3 W, 5 W, 8 W, 15 W, 50 W
- Feature: High EO conversion efficiency, high reliability and high temperature stability

VCSEL Module

- Packaging type: 3532, 3535, 3838, 5050
- Ultra high power: 60 W, 120 W, 240 W, 300 W, others customizable
- TO module: Line module with narrow spectrum, collimated module, dimension and angle customizable
- Module: 40*30, 60*45, 72*58, 110*90 view angle, accept customization with ordered WL, power and angle
- Applications: Facial recognition, Surveillance, UAV drone, Robot, Distance measurement and Hair removal etc.

18000 m² facility
Chip platform and device packaging platform

(MES) Whole process informatization management
Providing timely execution and tracking of schedules, resources and processes

Abundant product series
Meet diversified and enriched demands from market

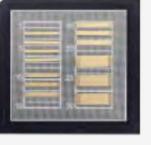

Sufficient production capacity
Advanced automated production line, sufficient production capacity, fully meet production requirements

12 key technologies
Contribute to high power, high efficiency, high reliability performance

Professional senior team
Core technologies, superb management, make good international "Optoelectronic devices"

Comprehensive management system
Fully guaranteed product quality standards
