We can also provide the following types coupler, pls. see the outline drawing.

*Four ports Dual Coupler*

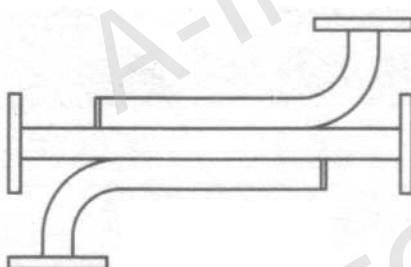

WUC Series

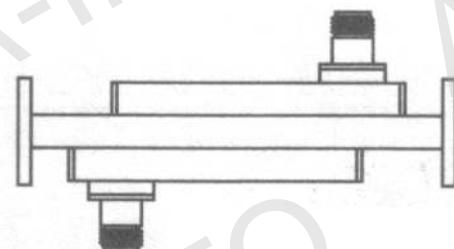

WUCN Series

*Dual Directional Coupler*

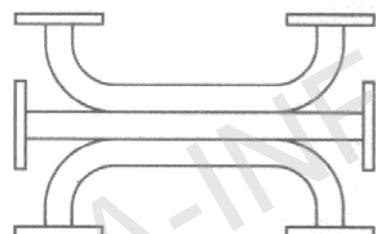

WDXC Series

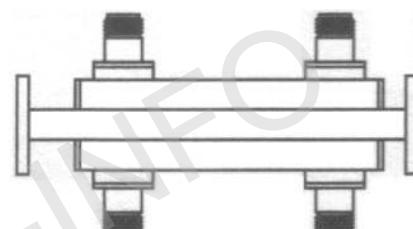

WDXCN Series

*Six Ports Dual Coupler*

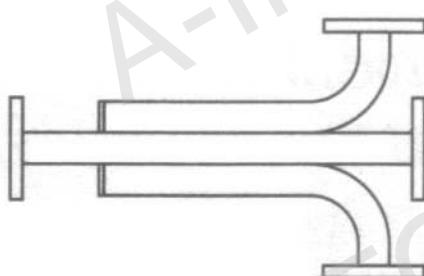

WDUC Series

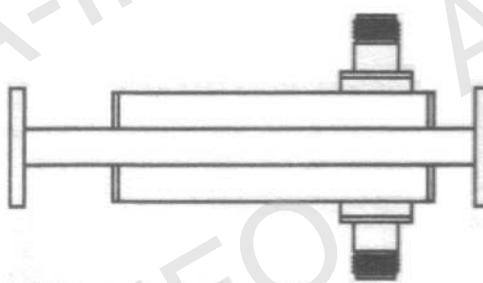

WDUCN Series

### Same Directional Coupled Power Divider

WDC Series

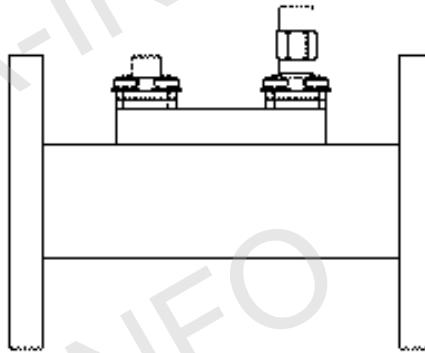

WDCN Series

Note:

For detailed information of above couplers, pls.feel free to contact us.

## Waveguide VNA Calibration Kits - CLKA1 Kits Series

284CLKA1-NRFEF\_DP

90CLKA1-SRFEF\_PB

34CLKA1-KRFEF\_BP

28CLKA1-KRFEF\_P0

### Features

- 0.75 to 110GHz
- WR975 Through WR10
- Fixed Load Calibration
- Support TRL and SSLT Calibration Method
- Keysight (Agilent), Anritsu and Rohde & Schwarz VNAs Supported

### Description

The A-INFO CLKA1 Series Calibration Kits are waveguide kits designed to provide accurate TRL(Thru-Reflect-Line) calibration of VNA for measurement in rectangular waveguide from WR975 to WR10 (0.75 to 110GHz). CLKA1 Series Calibration Kits provide all the necessary components for an accurate TRL calibration. In addition to TRL calibration, CLKA1 Series can also make SSLT(Short-Short-Load-Thru) and offset load calibration. All kit components have both standard flange and precision flange(APF Series).

### Components included in CLKA1 Series Waveguide Calibration Kits

QTY	Description	Notes
2	WG to Coaxial Adapter	Refer below table for each WG band.
1	Precision fixed termination	-
1	1/4-λ Spacer (shim)	-
1	Fixed (reference plane) Short	-
1	Verification Standard***	Optional, not included in standard Model.
1~3	Screw Pack	Qty is depending on WG band.
1	Dowel Pack*	For APF flange only.
1	Hex Ball Driver	-
1	Calibration Software**	Optional, not included in standard Model.
1	Carrying Case	-

#### Notes:

\*Indexing refer Precision Flange (APF)

\*\*Calibration Software currently supports Keysight 872x Series, PNA Series, Anritsu and Rohde&Schwarz ZVx Series. Please ask A-INFO for more information when place order.

\*\*\* Verification Standard is suggested used for WR28, WR22, WR19, WR15, WR12, WR10 Calibration Kit.

#### Model Information

Example Part Number: 430

CLKA1

-XABAB \_DP

Waveguide Size: WR975 to WR10

Product Code, CLKA1 Series WG Calibration Kits

Test Port Adapter Connector Option:

X: Connector type, S for SMA; N for N type; 3.5 for 3.5mm, K for 2.92mm, 2.4 for 2.4mm, 1.85 for 1.85mm.

A: Type for WG to coaxial adapter, R for Right Angle, E for Endlunch.

B: Gender for each adapter, F for female, M for Male.

**For Example: -SRFEF**, **S** means the connector type of WG to coaxial adapters in Calibration Kits is SMA. **RF** means one adapter is Right Angle with Female connector, **EF** means another one is Endlauch with Female connector.

**Order Kits with no Adapter Option:** use **-0**, For example 90CLKA1-0\_PB  
(Note: Each model listed below can offer "-0" option)

**Order Kits with Two WG/WG Test Port Adapters Option:** use **-1**  
(Note: No WG to Coaxial Adapter in "-1" option )

Flange Code, refer below model list table.

### Flange Description

Below flanges are available for WG Calibration Kits

- Standard Flange
- Precision Flange (APF)

The AINFO Precision Flanges(APF) on these components have precision indexing holes and indexing pins for precise mating alignment that maximizes measurement repeatability. They conform to all EIA WR standards for rectangular or round waveguide flanges.

## Waveguide VNA Calibration Kits - CLKA2 Kits Series

284CLKA2-NRFRF\_P0

90CLKA2-SRFRF\_PB

42CLKA2-SRFRF\_P0

28CLKA2-KRFRF\_P0

### Features

- Two Precision Fixed Loads
- 0.75 to 110GHz
- WR975 Through WR10
- Fixed Load Calibration
- Support TRL and SSLT Calibration Method
- Keysight (Agilent), Anritsu and Rohde & Schwarz VNAs Supported

### Description

The A-INFO CLKA2 Series Calibration Kits are waveguide kits designed to provide accurate TRL(Thru-Reflect-Line) calibration of VNA for measurement in rectangular waveguide from WR975 to WR10 (0.75 to 110GHz). CLKA2 Series Calibration Kits provide all the necessary components for an accurate TRL calibration. In addition to TRL calibration, CLKA2 Series can also make SSLT(Short-Short-Load-Thru) and offset load calibration. All kit components have both standard flange and precision flange(APF Series).

### Components included in CLKA2 Series Waveguide Calibration Kits

QTY	Description	Notes
2	WG to Coaxial Adapter	Refer below table for each WG band.
2	Precision fixed termination	Two terminations for CLKA2 series.
1	1/4-λ Spacer (shim)	-
1	Fixed (reference plane) Short	-
1	Verification Standard***	Optional, not included in standard Model.
1~3	Screw Pack	Qty is depending on WG band.
1	Dowel Pack*	For APF flange only.
1	Hex Ball Driver	-
1	Calibration Software**	Optional, not included in standard Model.
1	Carrying Case	-

#### Notes:

\*Indexing refer Precision Flange (APF)

\*\*Calibration Software currently supports Keysight 872x Series, PNA Series, Anritsu and Rohde&Schwarz ZVx Series. Please ask A-INFO for more information when place order.

\*\*\* Verification Standard is suggested used for WR28, WR22, WR19, WR15, WR12, WR10 Calibration Kit.

### Model Information

Example Part Number: 430

CLKA2

-XABAB \_DP

Waveguide Size: WR975 to WR10

Product Code, CLKA2 Series WG Calibration Kits

Test Port Adapter Connector Option:

**X:** Connector type, S for SMA; N for N type; 3.5 for 3.5mm, K for 2.92mm, 2.4 for 2.4mm, 1.85 for 1.85mm.

**A:** Type for WG to coaxial adapter, R for Right Angle, E for Endlunch.

**B:** Gender for each adapter, F for female, M for Male.

**For Example:** -SRFEF, **S** means the connector type of WG to coaxial adapters in Calibration Kits is SMA. **RF** means one adapter is Right Angle with Female connector, **EF** means another one is Endlauch with Female connector.

**Order Kits with no Adapter Option:** use **-0**, For example 90CLKA1-0\_PB  
(Note: Each model listed below can offer "-0" option)

**Order Kits with Two WG/WG Test Port Adapters Option:** use **-1**  
(Note: No WG to Coaxial Adapter in "-1" option )

Flange Code, refer below model list table.

## Standard CLKA2 Series Waveguide Calibration Kits Model List

EIA WR	Freq. Range (GHz)	One Right Angle Adp. One Endlaunch Adp. P/N	Two Right Angle Adps. P/N	Two Endlaunch Adps. P/N	Adapter Connector	Adapter Flange

### Flange Description

Below flanges are available for WG Calibration Kits

- Standard Flange
- Precision Flange (APF)

The AINFO Precision Flanges(APF) on these components have precision indexing holes and indexing pins for precise mating alignment that maximizes measurement repeatability. They conform to all EIA WR standards for rectangular or round waveguide flanges.

## Waveguide VNA Calibration Kits - CLKA5 Kits Series

### Features

- 1.7 to 40GHz
- WR430 Through WR28
- Sliding Load Calibration
- Support SSLT and SSL Calibration Method
- Keysight (Agilent), Anritsu and Rohde & Schwarz VNAs Supported

### Description

The A-INFO CLKA5 Series Calibration Kits are waveguide kits designed to provide accurate SSLT(Short-Short-Load-Thru) calibration of VNA for measurement in rectangular waveguide from WR430 to WR28 (1.7 to 40GHz). CLKA5 Series Calibration Kits provide all the necessary components for an accurate SSLT calibration. In addition to SSLT calibration, CLKA5 Series can also make one-port SSL(Short-Short-Load) calibrations. All kit components have both standard flange and precision flange(APF Series).

### Components included in CLKA5 Series Waveguide Calibration Kits

QTY	Description	Notes
2	WG to Coaxial Adapter	Refer below table for each WG band.
1	Precision Sliding Termination	-
1	1/4-λ Spacer (shim)	-
1	Fixed (reference plane) Short	-
1	Verification Standard***	Optional, not included in standard Model.
1~3	Screw Pack	Qty is depending on WG band.
1	Dowel Pack*	For APF flange only.
1	Hex Ball Driver	-
1	Calibration Software**	Optional, not included in standard Model.
1	Carrying Case	-

#### Notes:

\*Indexing refer Precision Flange (APF)

\*\*Calibration Software currently supports Keysight 872x Series, PNA Series, Anritsu and Rohde&Schwarz ZVx Series. Please ask A-INFO for more information when place order.

\*\*\* Verification Standard is suggested used for WR28 Calibration Kit.

#### Model Information

Example Part Number: 284 CLKA5

-XABAB \_DP

Waveguide Size: WR430 to WR28

Product Code, CLKA5 Series WG Calibration Kits

Test Port Adapter Connector Option:

X: Connector type, S for SMA; N for N type; 3.5 for 3.5mm, K for 2.92mm, 2.4 for 2.4mm, 1.85 for 1.85mm.

A: Type for WG to coaxial adapter, R for Right Angle, E for Endlunch.

B: Gender for each adapter, F for female, M for Male.

**For Example: -SRFEF**, S means the connector type of WG to coaxial adapters in Calibration Kits is SMA. RF means one adapter is Right Angle with Female connector, EF means another one is Endlauch with Female connector.

**Order Kits with no Adapter Option:** use **-0**, For example 90CLKA5-0\_PB

(Note: Each model listed below can offer "**-0**" option)

**Order Kits with Two WG/WG Test Port Adapters Option:** use **-1**

(Note: No WG to Coaxial Adapter in "**-1**" option )

Flange Code, refer below model list table.

### Flange Description

Below flanges are available for WG Calibration Kits

- Standard Flange
- Precision Flange (APF)

The AINFO Precision Flanges(APF) on these components have precision indexing holes and indexing pins for precise mating alignment that maximizes measurement repeatability. They conform to all EIA WR standards for rectangular or round waveguide flanges.

## Waveguide VNA Calibration Kits - CLKB1 Kits Series

28CLKB1-KRFRF\_P0

### Features

- 1.7 to 40GHz
- WR430 Through WR28
- Short-Short-Load-Through (SSLT) calibration method using offset short
- Sliding Load Calibration
- Keysight (Agilent), Anritsu and Rohde & Schwarz VNAs Supported

### Description

The A-INFO CLKB1 Series Calibration Kits are waveguide kits designed to provide accurate SSLT(Short-Short-Load-Thru) calibration of VNA for measurement in rectangular waveguide from WR430 to WR28 (1.7 to 40GHz). CLKB1 Series Calibration Kits provide all the necessary components for an accurate SSLT calibration. In addition to SSLT calibration, CLKB1 Series can also make one-port SSL(Short-Short-Load) calibrations. All kit components have both standard flange and precision flange(APF Series).

## Components included in CLKB1 Series Waveguide Calibration Kits

QTY	Description	Notes
2	WG to Coaxial Adapter	Refer below table for each WG band.
1	Precision fixed termination	-
1	Precision Sliding Termination	-
1	Fixed (reference plane) Short	-
1	1/8λ high precision offset short	-
1	3/8λ high precision offset short	-
1	Verification Standard	-
1~3	Screw Pack	Qty is depending on WG band.
1	Dowel Pack*	For APF flange only.
1	Hex Ball Driver	-
1	Calibration Software**	Optional, not included in standard Model.
1	Carrying Case	-

## Notes:

\*Indexing refer Precision Flange (APF)

\*\*Calibration Software currently supports Keysight 872x Series, PNA Series, Anritsu and Rohde&Schwarz ZVx Series. Please ask A-INFO for more information when place order.

## Model Information

Example Part Number: 284

CLKB1

-XABAB \_DP

Waveguide Size: WR430 to WR28

Product Code, CLKB1 Series WG Calibration Kits

Test Port Adapter Connector Option:

X: Connector type, S for SMA; N for N type; 3.5 for 3.5mm, K for 2.92mm, 2.4 for 2.4mm, 1.85 for 1.85mm.

A: Type for WG to coaxial adapter, R for Right Angle, E for Endlunch.

B: Gender for each adapter, F for female, M for Male.

**For Example: -SRFEF**, **S** means the connector type of WG to coaxial adapters in Calibration Kits is SMA. **RF** means one adapter is Right Angle with Female connector, **EF** means another one is Endlauch with Female connector.

**Order Kits with no Adapter Option:** use **-0**, For example 90CLKA5-0\_PB

(Note: Each model listed below can offer "-0" option)

**Order Kits with Two WG/WG Test Port Adapters Option:** use **-1**

(Note: No WG to Coaxial Adapter in "-1" option )

Flange Code, refer below model list table.

### Flange Description

Below flanges are available for WG Calibration Kits

- Standard Flange
- Precision Flange (APF)

The AINFO Precision Flanges(APF) on these components have precision indexing holes and indexing pins for precise mating alignment that maximizes measurement repeatability. They conform to all EIA WR standards for rectangular or round waveguide flanges.

## WG Flange

## 3.6 LD Type Flange (LFDP, LFDM)

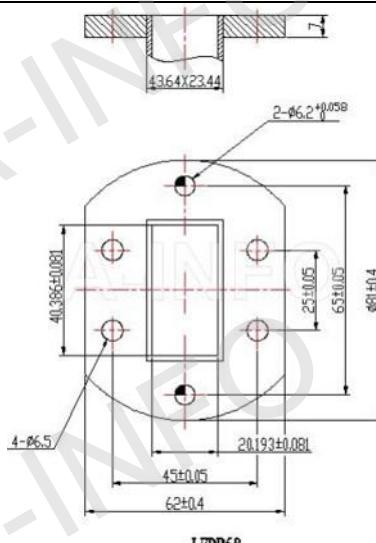

The technical drawing illustrates a mechanical component with the following dimensions and features:

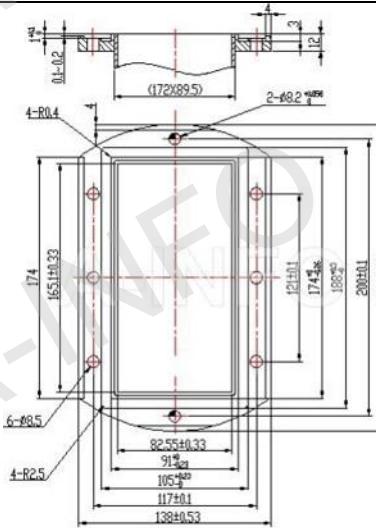

- Top slot width:  $38.1 \times 19.05$
- Top slot height:  $2-152^{+0.048}_0$
- Left side height:  $24.849 \pm 0.07$
- Left side hole diameter:  $4-15.5$
- Bottom slot width:  $37 \pm 0.05$
- Bottom slot height:  $49 \pm 0.34$
- Right side height:  $15.799 \pm 0.07$
- Right side hole diameter:  $25 \pm 0.15$
- Total height:  $56.81 \pm 0.4$

This technical drawing shows a component labeled **LEDM18**. The overall width is  $133.6 \pm 68.83$ . The top section has a height of  $12 \pm 1.2$  and a width of  $248.2 \pm 0.08$ . The bottom section has a height of  $138.4 \pm 0.6$  and a width of  $152.4 \pm 0.6$ . The central vertical slot has a width of  $64.77 \pm 0.26$ . The left side has a height of  $138 \pm 0.26$  and a width of  $129.5 \pm 0.26$ . The right side has a height of  $163.4 \pm 0.6$  and a width of  $98 \pm 0.1$ . The bottom edge has a total width of  $117 \pm 0.46$ . Various reference points and hole locations are indicated with red dashed lines and callouts.
