## AC/DC 75W Enclosed Switching Power Supply MORNSUN® LM75-20B09

#### **FEATURES**

- Universal 85 264VAC or 120 370VDC Input voltage
- Accepts AC or DC input (dual-use of same terminal)
- ullet Operating ambient temperature range: -30  $^\circ$ C to +70  $^\circ$ C
- Low standby power consumption, high efficiency
- High I/O isolation test voltage up to 4000VAC
- Low ripple & noise
- Output short circuit, over-current, over-voltage protection
- Over-voltage class III
- Operating altitude up to 5000m

LM75-20B09 is one of Mornsun's enclosed AC-DC switching power supply. It features universal AC input and at the same time accepts DC input voltage, cost-effective, low no load power consumption, high efficiency, high reliability and double or reinforced insulation. These converters offer excellent EMC performance and meet IEC/EN61000-4, CISPR32/EN55032, IEC/UL/EN62368, EN60335, GB4943 standards and they are widely used in areas of industrial, LED, street light control, electricity, security, telecommunications, smart home etc.

### **Product Characteristic Curve**

**MORNSUN®** 

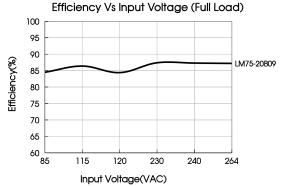

MORNSUN Guangzhou Science & Technology Co., Ltd.

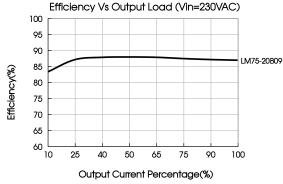

## AC/DC 75W Enclosed Switching Power Supply MORNSUN® LM75-20B09

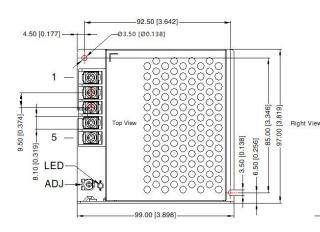

Note: 1. With an AC input voltage between 85-100VAC and a DC input between 120-140VDC the output power must be derated as per the temperature derating curves;

2. This product is suitable for applications using natural air cooling; for applications in closed environment please consult Mornsun FAE.

#### Dimensions and Recommended Layout

**Customer System** 

Note:

Unit: mm[inch]

ADJ: Output adjustable resistor

Wire range: 22-12AWG

Connector tightening torque: M3.5, 0.8N-m

General tolerances:  $\pm 1.00[\pm 0.039]$ 

#### Note:

- For additional information on Product Packaging please refer to www.mornsun-power.com. Packaging bag number: 58220119;
- Unless otherwise specified, parameters in this datasheet were measured under the conditions of Ta=25°C, humidity<75% RH with nominal input voltage and rated output load;
- The room temperature derating of 5°C/1000m is needed for operating altitude greater than 2000m; 3.
- All index testing methods in this datasheet are based on our company corporate standards; 4.
- In order to improve the efficiency at high input voltage, there will be audible noise generated, but it does not affect product performance and reliability;
- We can provide product customization service, please contact our technicians directly for specific information;
- Products are related to laws and regulations: see "Features" and "EMC"; 7.
- The out case needs to be connected to PE ( ) of system when the terminal equipment in operating; 8.
- The output voltage can be adjusted by the ADJ, clockwise to decrease; 9.
- 10. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units;
- 11. The power supply is considered a component which will be installed into a terminal equipment. All EMC tests should be confirmed with the final equipment. Please consult our FAE for EMC test operation instructions.
